

Emergency Treatment Authorization

Your pet has a serious and potentially life threatening injury or illness. Immediate emergency treatment is required. The cost for such treatment can be up to **\$500.00-\$600.00 for the first 30-60 minutes.** If you authorize emergency treatment, we will proceed immediately and you will be responsible for all associated charges. As soon as your pet is stable, the veterinarian will speak with you and prepare a detailed estimate for further care and treatment of your pet. **A deposit of 75% of the total estimate will be required at the time of hospitalization of your pet.**

Please choose one:

- I authorize immediate treatment for my pet and understand that I am financially responsible for this treatment.

- I do not want any treatments or diagnostics performed on my pet until I speak with a veterinarian first. **I understand this may delay potentially life-saving treatment.** Consultation/exam is \$95.

- I authorize a \$95 consultation/exam with the doctor +/- \$50 for miscellaneous treatment such as oxygen or pain medications.
